

A Cloud-Based Supply Chain Requires Rebuilding From the Ground Up

On-prem systems can only take you so far — and are not designed to fuel your new cloud ERP system. GHX cloud solutions are designed specifically to **optimize your cloud ERP system** through partnerships with leading ERP vendors — including Infor, Oracle and Workday.

GHX's cloud solutions help you achieve a **clinically integrated supply chain** as you:

Shift to value-based care

Build supply chain resiliency

Improve accuracy in financial forecasting

Manage cost-of-care

It's more than just bridging the gap.
It's starting over in a new environment.

On-Prem Solutions

Item Data Management and System Delivery Solutions

Improve accuracy of item data to run an efficient order cycle process and a contained item master

- NuVia®
- Clinical ConneXionSM

Procure-to-Pay Solutions

Begin to automate processes, generate data, and improve accuracy and efficiency

- Exchange Services
- CCXpert
- OnDemand AP® Base E
- Provider Intelligence

Moving to Cloud:

Category Optimization for Cloud

Impact outcomes with evidence-based data

- Evaluate and compare savings opportunities across 45 PPI categories
- Identify supply chain cost drivers and variation at the case level
- Further strengthen data foundation with another source of accurate clinical data
- Tap into solution advisors to better understand outcomes

Data Connect for Cloud

Build a unified and synchronized data foundation

- Clarity and consistency to all users of item information
- A single and efficient process for maintaining data in your ERP and connected systems
- Update in your ERP in minutes, reducing manual interventions
- Simplify the churn, change and complexity of data management
- Foundational data for punchout and embedded ERP requisitioning
- Efficiently manage your expanding item data sets

Exchange Enterprise for Cloud

Automate transactions for more insight and lower operating costs

- Maximize negotiated prices by driving contract alignment
- Purchase the right product every time by automating POs, POAs and ASNs
- Vet vendors for safer purchasing
- Lower AP costs with automated invoice exception handling
- Understand supply chain performance with aggregated transaction data
