# GHX

E-COMMERCE IS THE FOUNDATION FOR GREAT B2B TRADING RELATIONSHIPS

Having an easy and effective way of transacting business with your trading partners is critical to future growth — don't let resources stand in the way of a robust e-commerce strategy. Quickly build your e-commerce business with custom EDI mapping and expert management of your day-to-day needs for connectivity and monitoring.

Let GHX manage and maintain your EDI infrastructure in order to:

REDUCE
costs and overhead
for infrastructure

STREAMLINE
and gain visibility into
supply chain activities

FREE UP
your internal resources to
focus on growth objectives

MAINTAIN
an agile and prepared
technology environment

INCREASE
automation and
e-commerce utilization

Uniting the best of healthcare™

A cost-effective alternative to managing EDI in-house

EDI Transaction Standardization

Focus on what you do best — serving your customers, developing new products and blazing a path into new market areas. The EDI Mapping managed service reduces the need for investment into new technology and infrastructure and the additional resources to oversee EDI processes day after day. GHX provides and operates a turn-key mapping service that allows you to focus on the critical business initiatives that drive growth.

We know EDI mapping and we know the unique needs for the healthcare industry. Our nearly two decades of experience in helping healthcare suppliers process supply chain transactions delivers expertise beyond the technical needs for EDI mapping and infrastructure maintenance.

FEATURES & BENEFITS

Supports EDI transaction sets with data translation, mapping and production	Manage infrastructure, software upgrades and specified mapping edits	Monitor transaction traffic and failures with root cause identification	Enable better service support for your customers	Relieve internal IT resources of the time and effort to manage EDI infrastructure
