

THE DATA PLATFORM THAT POWERS YOUR ERP SYSTEM

Building a foundation for long-term success

The modern healthcare organization is data driven, so your cloud ERP system will be foundational for years and decades to come. However, implementation takes significant effort, diligence and planning, and you want to get it right the first time.

Ultimately, success hinges on three things: the quality of your data, the sophistication of the solutions you use and the expertise of your partners. A miss on any one of these can hold you back rather than propel you forward.

GHX is the strategic data platform for healthcare

For more than 20 years, GHX has worked with leading healthcare organizations to perfect innovations in supply chain data management, commerce and automation.

90% of the US acute care market relies on GHX solutions.

To bring your cloud ERP system to life on time and on budget, you'll need continuous data integrity, a deep understanding of the complex demands of the healthcare industry, and the demonstrated ability to collaborate with leading ERP vendors. Only GHX offers all three.

Access expertise with an exclusive focus on healthcare

With providers and suppliers, we work to **create innovative solutions** that improve operational efficiency and patient outcomes

We operate the **largest digital trading network** in healthcare

Together, **we take more than a billion dollars out of the cost of delivering healthcare**—every year

Uniting the best of healthcare.™

Make the clinically integrated supply chain a reality
