

Provider Intelligence

Greater Transparency Drives Supply Chain Success

> With a better understanding of your supply chain performance, you can be intentional in where to focus effort for greater success. In order to get there, you

need visibility into operational and financial performance with a clear, current picture of spend and operational efficiency based on aggregated data from multiple sources.

Provider Intelligence (PI) is a cloud-based application that measures and tracks supply chain metrics using comprehensive data from GHX solutions as well as your hospital's ERP system for a holistic view. Bringing this information together provides visibility into your organization's operational and financial performance anytime, anywhere. The interactive graphs and charting tools provide an uncomplicated and intuitive analytics platform to track key performance indicators (KPIs) and progress towards your organizational goals.

Simple data visualizations illustrate areas for immediate attention to achieve goals like vendor standardization, non-file spend reduction and increased contract compliance. Join the GHX community to leverage benchmarking and take control of your data.

PROVIDER INTELLIGENCE ENABLES YOU TO:	HELPING YOU:
Analyze aggregated supply chain analytics from GHX solutions as well as other data sources with easy-to-understand visualizations across all departments, facilities and vendors in one place using an intuitive and interactive platform	View data holistically without the headache of matching data from disparate systems
Prioritize efforts for the greatest cost saving and standardization opportunities by translating data into actionable improvements in areas such as electronic trading partner opportunities and categories with large volumes of exceptions	Establish spend goals specific to the needs of your organization and focus on the most efficient and accurate ways to do business with your trading partners
Measure performance by automatically capturing information needed for continuous goal tracking progress with dashboards, benchmarking data and reporting tools	Make cost-cutting and standardization initiatives on an ongoing basis with month-over-month and up-to-date data to easily spot trends and gauge effectiveness of goal execution

➤ Transform Data into an Actionable Strategy for Improvement

From high-level executive dashboards to item level reporting, Provider Intelligence interprets and elevates information in your current GHX solutions into actionable supply chain decisions that drive cost-cutting initiatives. This comprehensive, yet approachable spend analytics platform helps you make proactive supply chain decisions that align with your operational and financial strategy.

- ✓ **Identify electronic automation opportunities with suppliers in the GHX network.** Track the rate and amount of automation adoption by individual facility, groups of facilities or supplier growth. Track transaction automation by purchase order (PO), invoice, advanced ship notice (ASN) or consignment and apply filters for facility, vendor, GHX MetaTrade and more.
- ✓ **Nurture successful trading partner relationships.** These relationships are characterized by accurate data, low percentage of exceptions and high percentage of price matching. Track by facility or vendor for exceptions such as contract price, UOM, rejected, backorders, or for recurring exceptions.
- ✓ **Identify opportunities for standardization.** Obtaining a detailed understanding of where you are spending money is the only way to truly manage spend. Quantify spend by UNSPSC category, and by facility and product.
- ✓ **Develop strategies to improve contract compliance.** Reign in rogue spending when you can identify top products to move on to contract. Data can be captured by spend category drilled down using heat map visualization from high-level UNSPSC categories to vendor item number detail.
- ✓ **Track item management health.** Track the performance of item master utilization around non-file spend, description analysis, categorization of spend, price deviation and much more.
- ✓ **Share insights with robust reporting.** In addition to rich KPIs and dashboards, reports and further insights can be accessed via PI Reports where "transactional" data can be configured, scheduled for monthly or ad-hoc reporting needs and shared.

➤ GHX Global Network

The largest community of healthcare supply chain trading partners, the GHX Global Network connects supply chain, finance and clinical professionals with their suppliers and partners. The 4,000+ provider organizations and 400+ manufacturers and distributors in this community are working together to drive billions of dollars out of the cost of the healthcare supply chain.
