

THE CLINICALLY INTEGRATED SUPPLY CHAIN DATA TO DRIVE COLLABORATION

Can You Afford to Stay on the Path of Status Quo?

COVID has forced health systems to reevaluate the operational status quo. The pandemic's catastrophic financial impact has accelerated the need to address long-standing supply chain transparency challenges relating to clinical item spend.

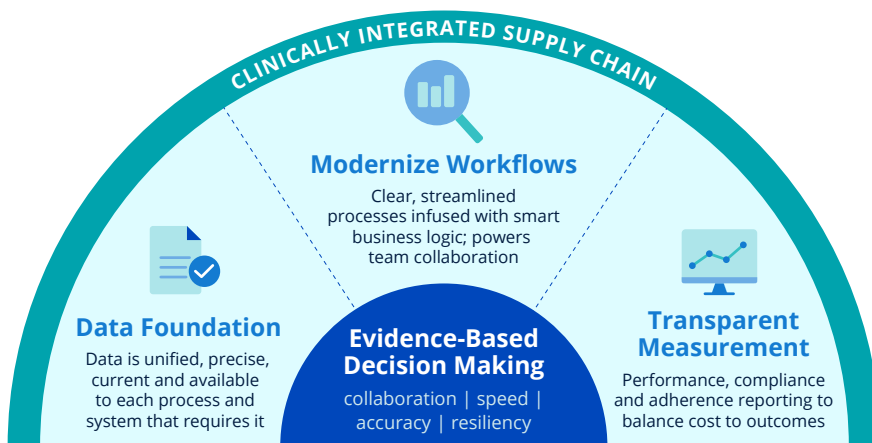

Industry experts agree that there is an urgent need to bridge this supply chain-clinician gap. However, without visibility into the data needed to support cross-functional decisions, developing a clinically integrated supply chain has been a slow and challenging exercise for many health systems.

Thanks to the combined solutions of GHX and Lumere, health systems can now effectively and efficiently build a clinically integrated supply chain. By helping enable health systems to move beyond the traditional procure-to-pay model and to develop a holistic demand-to-outcome framework, it is possible to minimize supply costs without sacrificing care quality or outcomes.

A New Path Forward

Our trifecta of integrated solutions combines the GHX Unified Data Core with Lumere's evidence-based research and modernized workflows to help you build a clinically integrated supply chain that powers dynamic decision making and creates connections with financial and clinical teams.

Uniting the best of healthcare™

The Clinically Integrated Supply Chain with Lumere and GHX

Single source of truth to drive item and price accuracy

Unbiased online clinical research library for product evaluation and comparison

Attributed product data, including GUDID, GDSN and HCPCS

Comparison of local hospital outcomes with evidence and manufacturer claims

Value analysis workflow with cross-functional capabilities to engage physicians

Accurate product usage tracking within the EHR to expedite billing and minimize DSO

Clinically vetted savings opportunities

More visibility into clinical inventory for control and accuracy

Utilization and spend monitoring at the case and physician level

THE GHX AND LUMERE DIFFERENCE

Data You Can't Get Anywhere Else

- Verified data core
- Evidence-based decisions
- Minimize costs
- Optimize outcomes

Insights Delivered, Any Destination

- Put intelligence to work
- Modernize processes
- Break down silos
- Interoperable data

Unlock the Power of the Largest Trading Network

- Visibility and impact at scale
- Forefront of innovation

Evidence-Based Strategy Across the Demand-to-Outcome Process
