SYFT SYNERGY® PLATFORM
SMARTER CLINICAL SUPPLY CHAIN

SYFT
a GHX company
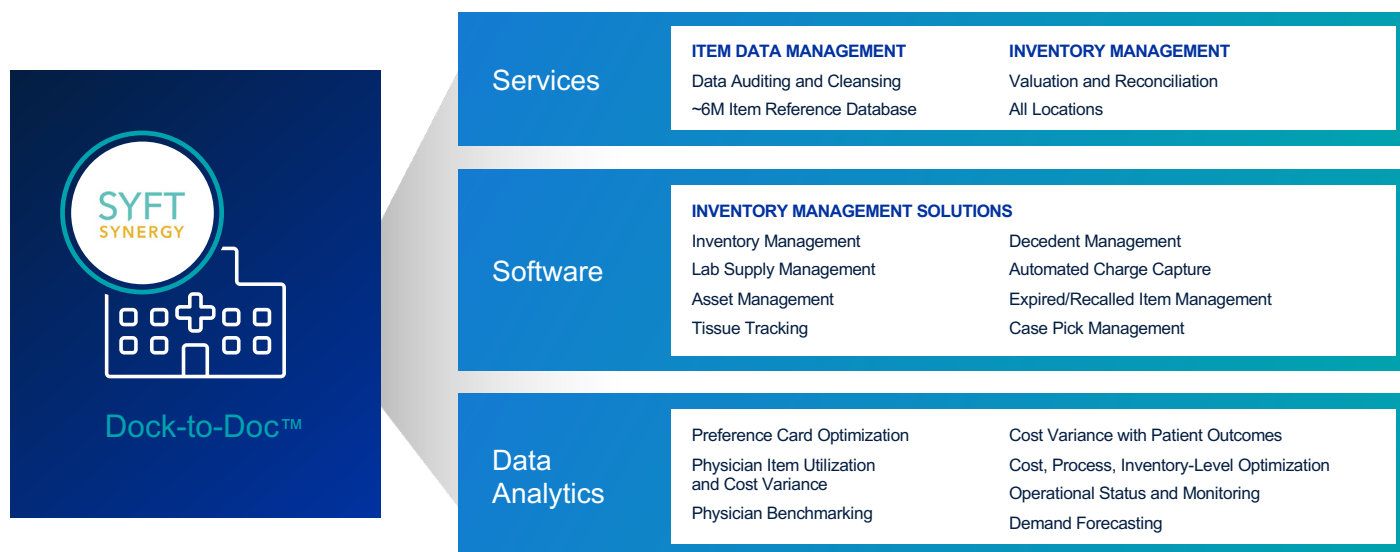

The Syft Synergy platform gives supply chain and clinical staff visibility into products being used across the entire healthcare system including those within perioperative, procedural, and nursing units. This enables healthcare leaders to better understand supply spend, consumption, waste, and variance, resulting in standardization opportunities and surgical cost savings.

Leveraging Your EHR and ERP Investments

Syft Synergy's open architecture is designed to seamlessly integrate to ERP, EHR and other systems deployed either on-prem or in the cloud. Syft Synergy supports iOS and Android-operating devices with barcode and RFID enablement. Our deep level of integration is unique in the market and enables Syft Synergy to deliver unmatched value.
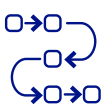

SYFT SYNERGY

Dock-to-Doc™

Services

ITEM DATA MANAGEMENT	INVENTORY MANAGEMENT
Data Auditing and Cleansing	Valuation and Reconciliation
~6M Item Reference Database	All Locations

Software

INVENTORY MANAGEMENT SOLUTIONS

Inventory Management	Decedent Management
Lab Supply Management	Automated Charge Capture
Asset Management	Expired/Recalled Item Management
Tissue Tracking	Case Pick Management

Data Analytics

Preference Card Optimization	Cost Variance with Patient Outcomes
Physician Item Utilization and Cost Variance	Cost, Process, Inventory-Level Optimization
Physician Benchmarking	Operational Status and Monitoring
	Demand Forecasting

A Holistic Approach

An alternative to technologies that work in silos to manage supply-related activities, Syft Synergy is a comprehensive platform of software and services.

Single enterprise platform for large IDNs	Ease of implementation	Plug-n-play capabilities	One vendor to manage	Integration with MMIS, ORIS, EHR, and ERP; Retain local system source of truth	Cloud deployment model

GHX

Improving Workflows For Your Key Stakeholders

Key stakeholders across many departments need better tools to do their jobs. Syft Synergy offers a range of capabilities that reduce error-prone processes, improve labor efficiencies and help healthcare leaders better manage total utilization and cost of healthcare procedures from dock-to-doc™.

Supply Chain Leader	Perioperative Leader	OR Nursing Staff	Physicians, Surgeons	CFO, COO, CNO	Risk Management	Decedent Affairs
Gain better visibility, traceability, and financial control of supplies	Improve process efficiency, analyze/optimize supply usage and costs, and improve staff satisfaction	Reduce time managing inventory and more time caring for patients	Improve OR efficiency, ensure supply availability, and reduce infection and safety risks	Optimize clinical operations, capture true case costs, reduce supply spend and improve margins	Reduce usage and waste of expired products and capture implantable regulatory information	Expedite decedent mgmt. tasks including tracking, documentation, reporting, and communication among key stakeholders

SYFT SYNERGY

Item Data Management, Inventory Services, Supply Chain Automation and Demand Forecasting Software	Perioperative and Procedural Point-of-Use Analytics Engine	Automated pick-lists, ordering, and documentation of materials consumption during patient procedures	Preference Card Optimization	Supply Chain Optimization, Cost Optimization, Cost Variance Analytics, Physician Benchmarking Reports	Expiration/Lot/Serial Recall Tracking	Decedent Management and Tracking Software

A Stronger Community Through Strategic Partnerships

Syft proudly partners with many leading healthcare technology vendors and other important organizations. Through these strategic alliances, Syft continues to add new platform functionality and programs for its valued customers.
