GHX
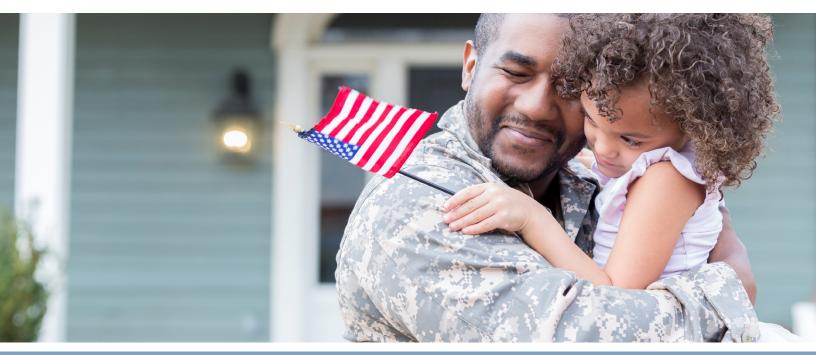

Solutions for the U.S. Government

UNIFYING THE BEST OF HEALTHCARE FOR THOSE WHO SERVE US

GHX BY THE NUMBERS

❯ Dollars cut from healthcare every year: **$1B**

❯ Cleansed and attributed items in healthcare's largest virtual item master: **6M**

❯ Providers in the GHX Network:
  US: 4,100 | Europe: 1,500

❯ Suppliers in the GHX Network:
  US: 600 | Europe: 350

❯ GHX, the world's leading healthcare business and data automation company, is a trusted provider of innovative solutions and services to the U.S. government, including the Defense Health Agency, Defense Logistics Agency, and military health system hospitals.

At a time of extraordinary pressures on the federal budget and workforce, GHX offers federal agencies the power of the leading healthcare supply-chain solutions to deliver better care at lower cost for military service members, veterans, and other beneficiaries.

Innovative Solutions for the U.S. Government

Data Management

Data is critical to the health of your supply chain, and our solutions help provide the most accurate, up-to-date, standardized data in your materials management information system (MMIS). Clean data flowing through your systems helps improve the efficiency and effectiveness of your entire supply chain. Learn More

Exchange Services

Drive down supply costs with the largest electronic data interchange (EDI) in the healthcare industry, serving more than 4,100 providers and 600 med-surg suppliers. The services automate the ordering process to reduce manual work, eliminate barriers to getting products to clinicians, and provides real-time access to transaction data and vendor information. Learn More

Contracting

Control spend with increased visibility and the healthcare industry's leading real-time repository of contract pricing. A three-way price match – purchase order (PO), acknowledgement, and contract price – helps providers save money by paying the correct purchase prices and improves contract utilization with the industry's only source of supplier-verified data. Learn More

Requisitioning

Reduce off-contract spending with formulary-based requisitioning and access to quality item data to help buyers find the supplies they need. A simple ordering process completes the transaction. Enable more accurate purchasing with a seamless flow from requisition to approval and purchase order (PO). Learn More

Vendormate Credentialing

Government facilities manage vendors and their representatives in a cost-effective way to meet requirements for regulatory compliance, internal controls and patient safety with Vendormate Credentialing. Facility access procedures and vendor credentialing requirements are customizable for any location. Learn More
