

GHX Syft Inventory Services

A More Accurate Inventory Solution

A healthy supply chain starts with an accurate inventory. Our solution helps supply chain leaders fully understand the scope of their inventory through technology-enabled inventory counts and actionable reports. GHX provides supply chain leaders with an accurate point-in-time inventory for year-end, mid-year and baseline reporting. The results are an itemized and auditable inventory.

Experience Makes All the Difference

With over twenty years' experience, GHX Syft has become the trusted provider of hospital inventory services. In the last decade alone, we have conducted more than 12,000+ inventory counts and \$23.3 billion in inventory valued.

GHX uses proprietary technology for capturing and reporting data in supply chain areas, pharmacy locations, and clinical areas such as operating rooms, cath labs, as well as many other hospital cost centers.

Our skilled inventory teams are known for quality customer service, efficiency and timely results.

Enterprise Wide Benefits

- Allow clinical and supply chain staff to stay focused on their respective tasks
- Quantify vendor managed consignment items
- Minimize overtime associated within-house inventory
- Reduce risk of using expired products in patient care
- Identify possible over-stocking and over-ordering
- Identify inventory storage locations
- Spot potential hoarding

Anytime Online Accessibility: a Key Differentiator

A big advantage to partnering with GHX is a dedicated customer portal where credentialed users can view and export data and generate custom reports to meet their specific needs.

Actionable Insights at Your Fingertips

GHX Syft Inventory Portal Database

- Mature, stable SQL database architecture
- User-level login credentials with full visibility/access controls
- 24x7 online accessibility and timestamped traceability

Centralized Data Repository

- Consistently accessible, repeatable & comparable valuation results year after year
- Client input data repository for uploads/downloads (e.g. item master, PO history, etc.)
- Current and historical inventory valuation results/reports

Reports and Actionable Insights

- **Summary Inventory Report:** Reported at building, department and area-level, including expired/consigned items
- **Detailed Inventory Report:** Reported at the line item level within buildings, departments and other areas
- **Unmatched Report:** Identify items without matching reference in client's item master or PO history. GHX Syft's proprietary reference database is available to compute value of unmatched items
- **Advanced Reporting:** Permits client to develop custom reports

Inventory Services for Hospital Pharmacies

Planning for and conducting pharmacy inventory valuations can be time consuming and labor intensive. Partnering with GHX inventory specialists alleviates these challenges especially during busy summer months and holidays when hospital staff is stretched thin. GHX Syft has conducted thousands of physical inventory valuations over the past twenty years allowing pharmacy management and technicians to focus on their daily tasks, ensuring departmental efficiency.

All-Inclusive Services

- Services include inpatient, outpatient, satellite/retail, and automated dispensing units
- GHX utilizes hospital's acquisition costs from wholesaler purchase history and direct contracts
- Counts are performed independently and accurately (unit dose, nearest tenth)

Comprehensive Reporting

- Data includes location, quantity, package size, manufacturer, NDC#, generic name, strength, form, trade name, class, unit price and extended price
- On-site audits with documentation of test count detail for internal and external auditors
- Summary and detailed reports included (exportable in several formats including Microsoft Excel)
- Therapeutic class reporting option
