## Our Commitment

GHX is honored to be your vendor credentialing provider. As experts in this area, our team has developed strategic tools and best practices to help you achieve a more advanced, efficient, and effective regulatory compliance program, supporting increased patient safety.

## Pushing Reset

To optimize the value we provide, we have pushed “reset” and revamped our program to include the addition of new team members who are excited to work with you. The **Compliance Solution Specialists** are highly specialized and trained to provide more proactive and concentrated support.

In our commitment to help address compliance gaps, we need to be diligent. We will be hosting standing monthly appointments where we can collaborate with your organization and provide individualized assistance and support based on your organization’s specific needs and challenges.

In addition, we will be providing education in the form of newsletters, posters, and on-boarding vignettes. These tools will help your employees identify potential compliance issues, recognize champions, and understand what to do when non-compliance is spotted. A central feature is the “no badge, no entry” campaign, which is fundamental in providing patients and employees with a safer environment.

## Tools and Best Practices

**Validated Compliance Scorecard:** Designed to provide a snapshot of how well a hospital organization is performing toward our collaborative goal of best-in-class compliance. The innovative metrics quantify critical impact measurements so that we may improve a specific process or series of processes.

**Secure Facility Access for Vendors:** We will be managing your vendors and their representatives with customized, critical screening processes to help meet your goals for regulatory compliance, safety, and facility access.

**Centralized Documentation:** The ability to centralize all credentialing documentation with on-demand access for improved audit preparedness will better allow for standardization across the organization.

**Risk Reviews:** Our team will provide regular reviews to share compliance best practices and suggest strategies to advance and elevate system-wide compliance. We’ll also provide exclusion checks, and provide monitoring services for vendor access and badging to help reduce risk.
