

# Exchange Enterprise for Cloud TRANSACTION AUTOMATION AND ANALYTICS TO MAXIMIZE YOUR CLOUD ERP

A single supply chain platform to drive new levels of operational efficiency and accelerate the journey toward a clinically integrated supply chain

**Exchange Enterprise for Cloud** is an interconnected, scalable supply chain platform. When integrated with your cloud ERP system, you have a resilient foundation based on modern business processes and visibility to the impact of supply chain initiatives on the cost, quality, outcomes equation.

You can only fully leverage your cloud ERP by expanding automation

# HOW

## Respond to disruption and increase resiliency

- Transact electronically with all trading partners and maximize order management, including order, order acknowledgment and invoice processing
- Automate order acknowledgment to empower efficiencies in downstream processes like case prep, logistics and invoicing
- Build standardized and agile processes for supply chain
- Receive timely confirmations and increase touchless invoice processing
- Get data about purchasing volume, supplier inventory and contract compliance
- Take action with insight about products used for patient care, sourcing activity/purchasing

## Drive process improvements and reduce IT costs

- Drive alignment with your suppliers with shared performance analytics for supply chain
- Reduce software from multiple vendors, the overall number of vendors you work with and vendor risk
- Gain better insight into operations and spend with all of your supply chain data aggregated onto one platform

## Help protect patients and staff and defend against negative financial impacts

- Access compliance insight on your vendors at the order level
- Add suppliers with confidence
- Obtain ongoing visibility into sanction information at the order level for continuous compliance that can impact reimbursements and to protect patients and staff

## Reduce overpayment with accurate contract data

- Help control supply chain costs by leveraging your negotiated contract price
- Establish specific spend goals and improve contract compliance with data that can be captured by spend category to identify products to move onto contract
- Access to contract data for purchasing teams
- See the best available contracted price for every item on every order
- Negotiate renewals based on true and aggregated contract spend data
